A probable mind map like this could be created by the class work through a brainstorming. Every proposal coming from students will have to be written, then the true and correct one will be accepted

Environment:

The complex of physical, chemical, and biological conditions that allow every organism to live and grow: the shapes of the Earth's surface such as mountains, lakes and rivers, natural phenomena, climate, flora and fauna
The visible and invisible features of a place

Landscape:

Is made up of all the visible elements of a certain territory
The visible appearance of a place

The landscape is given for the eye

Expanse of scenery that can be seen in a single view or an extended area of land regarded as being visually distinct

ENVIRONMENT

Visible features
Invisible features
Physical conditions
chemical and
biological conditions
natural phenomena
climate

LANDSCAPE

Visible appearance

Mountain
River
Coast
City
Nature
Flora
Fauna
human

Natural and human-made aspects

Natural	Human - made
Mountain	House
Volcano	Village
Hill	City
Plain	Factory
River	Bridge
Tree	Street
Forest	Cultivated field
Desert	Farm
Land	Port
Sea	Harbor
Ocean	
Island	

Natural

Things that are natural are made by nature, not by humans.

Natural things are not artificial.

Human-made

Things that are artificial are made by humans.
Those things are “human-made”.

They are not made by natural processes.
