

Unit 4: cities of the future

19th lesson

- 20' – smart cities. Examples.

Smart cities are not only a dream for the future, but they start now.

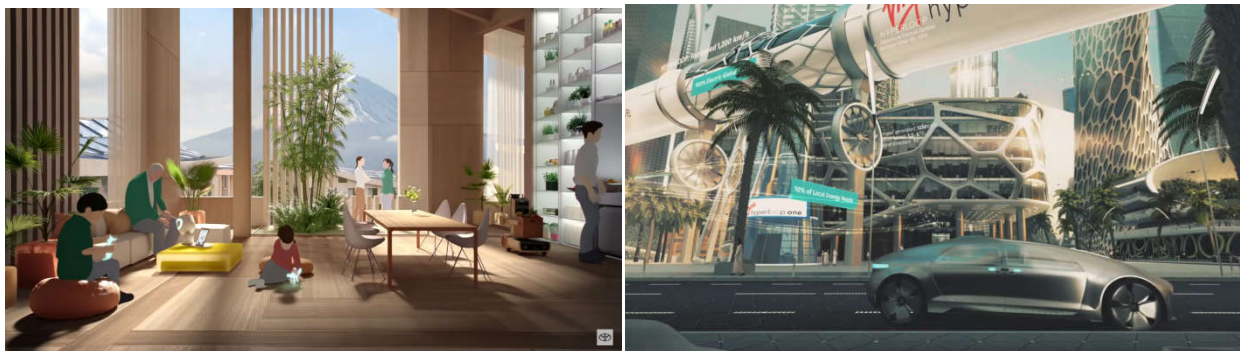

In Japan, Toyota is building a new city, Woven City, which “will be a fully connected ecosystem powered by hydrogen fuel cells”:

The teacher shows these videos and discusses again about new cities.

- 30' – final review

The teacher explains the next test and gives instructions on how to prepare for it.

To review the vocabulary about slums, birth rate and density, problems of cities and smart cities, the teacher prepares a short test using Quizizz, Quizlet, Kahoot or Wordwall.
