HTML: tools

Unit 1 – Lesson 2

TEACHER CORRENTE MARIA LUISA

Before we start...

- Let's recap with [Kahoot](#)

Individual work

- Search on the Internet information about how to create a web site

Work in pairs

- Compare your work with your classmate

- Order your information in steps to follow

Tools: all you need are

1. Text editor

2. Web browser

Tool: Notepad++

- You will learn how to:

1. Create a new file

2. Save the file as an HTML file

3. Customise the software

Some verbs

Verbs	Meaning
To type	To write on a computer
To indent	To start a line further from the margin than the main part of the text
To be nested	To be within something

Focus on the terms

- What is the key to indent?

- Why do we indent the code?

- Why do we need the word nested? What did you notice from the given code?

Individual work

- Create a folder and name it as <u>HTML – (today's date)</u>

- Copy the following HTML page and save it in the folder as <u>index.html</u>

```html
<!DOCTYPE html>
<html>
    <head>
        <title>First example</title>
        <meta name="author" content="Luigi">
    </head>
    <body>
        <h1>My first web page</h1>
        <p>HTML is the language used to create websites.
        <br>It uses tags to display elements.
        <br><img src="images/logo.png">
        <a href="https://www.w3schools.com/html/default.asp">Click here</a>
        if you need more information.</p>
    </body>
</html>
```
